

I would hope that you reject the self-serving petition from the National Association of Broadcasters - Number 04-160.

I gladly pay for Satellite Radio because I do a great deal of travel by automobile. In Florida reception in many of the areas where I drive is so bad that without satellite radio I would have nothing to listen to, and no news. The same applies when I drive outside Florida. Weather information as I travel is very important, and having to rely on local broadcasts is difficult at best in some areas of the state. And when I leave Florida to visit friends and family in other states, I like being able to keep abreast of traffic and weather without searching for a reasonably-competent station.

Thank you.
Peter Pockel
